Project Planning Phase

Milestone & Activity List

Team ID	PNT2022TMID12811
Project Name	Industry-Specific Intelligent Fire Management System

Sprint	Milestones
Sprint-1	Using WOKWI, we are going to connect temperature, flame and gas sensor to the Arduino. If the sensed temperature is greater than the threshold, fire alert message send to cloud.
Sprint-2	Create and configure the IBM cloud platform and workshop using NodeRed service
Sprint-3	Using MIT app inverter, develop a software application for fire management system. It is used to display the alert message to the user.
Sprint-4	Connect WOKWI and MIT app invertor with IBM cloud platform .Set the modules and test the software
